PROFILE SUMMARY

Aspiring Software Developer and B.Tech Information Technology student with knowledge of Java, React, TypeScript, Node.js, MongoDB, and web development. Experienced in building practical web applications through academic and personal projects. Eager to apply technical skills, problem-solving abilities, and continuous learning to contribute to a software development team.

EDUCATION

Bachelor of Technology (B. Tech) – Information Technology

Matoshri Aasarabai Institute of Technology & Research Center, Eklahara, Nashik
2025-Present

Diploma in Computer Engineering | Aggregate: 79.66%

Smt. Sharachchandrika Suresh Patil Institute of Technology, Chopda, Jalgaon
2022 – 2025

INDUSTRIAL TRAINING

Industrial Trainee – Java Full Stack Web Development

Passion Software Solution, Jalgaon | June 2024 – July 2024

- Completed industrial training focused on Java web application development.
- Worked with Core Java and object-oriented programming concepts.
- Gained practical exposure to backend development and application workflows.
- Learned basic industry-level coding standards.

PROJECTS

GILIZA AI – AI-Powered Healthcare Management Platform

Technologies: React.js, Node.js, TypeScript, MongoDB, REST APIs, AI

- Developed an AI-powered healthcare platform with role-based dashboards for **Patients, Doctors, Hospitals, and Administrators**.
- Implemented healthcare features including **appointment management, health records, telemedicine, prescriptions, laboratory, radiology, pharmacy, and billing**.
- Integrated React frontend with Node.js backend and MongoDB database using REST APIs for **dynamic data management**.
- Developed AI-powered features such as **symptom checking, AI reports, and Giliza X healthcare assistance**.
- Designed responsive, user-friendly interfaces with secure authentication and role-based access control.

NEXA – Electric Billing System

Technologies: Java, HTML, CSS, JavaScript, Database Fundamentals

- Designed and developed an electric billing system to **calculate and manage electricity bills efficiently**.
- Implemented user modules for bill generation, customer details, and **payment records**.
- Used Java programming concepts such as OOP, conditional logic, and file/database handling.
- Improved **accuracy and automation** in electricity bill calculation.

Live Demo: <https://billing-484e7.web.app>

DIGIASSIST – Digital Learning Assistant

Technologies: Java, HTML, CSS, JavaScript, Database

- Designed and developed a digital learning assistant to help beginner-friendly users learn programming languages through **structured roadmaps and curated educational resources**.
- Applied web development concepts including **frontend-backend integration** and basic database handling.
- Implemented backend logic using **Java** for content handling and user interaction.
- Integrated a **text-to-speech** feature to improve accessibility.
- Implemented user-friendly navigation and a structured content experience.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, HTML, CSS

Frontend: React.js, Vite

Backend: Node.js

Database: MongoDB

Tools: Git, GitHub, VS Code

Concepts: Object-Oriented Programming (OOP), REST APIs, Database Fundamentals, Responsive Web Design

Currently Learning: Full-Stack Development, Modern Web Technologies
